ASK YOUR CHILD ABOUT:

What planet do we live on?

What is the sun?

Which is the biggest planet?

This week we talked about planets. We painted planet earth in green and blue. We're learning about each of the planets' names and shapes hanging in the room. They were amazed at the size difference of the sun to each of the planets. We also made a rocket ship spelling each of their names.

Another fun topic we explored this week was magnets. The children were excited to search for items hidden in a box of plastic chips using a magnetic wand. We discovered what would and would not stick to the magnet and other fun activities.

Here are some upcoming dates to put on your calendar:

*Grandparents Day-Mar 27th

*Spring Break-Mar 13th - 20th

*Egg Hunt Apr 2nd

NEXT WEEK THEME

Ocean (U)

SNACK BUCKET

Tues- Benzen

Wed- Brooks

ASK YOUR CHILD ABOUT:

What planet do we live on?
What is not on the moon?
What is the sun?
Which is the biggest planet?

Can you imagine what would happen if we did not have gravity? The boys and girls had no trouble understanding this concept. As one child said, "Gravity is what helps us stick to the ground." I liked that definition. We also studied space, planets, and the sun.

Another fun topic we explored this week was magnets. The children were excited to search for items hidden in a box of plastic chips using a magnetic wand. We discovered what would and would not stick to the magnet and other fun activities.

Here are some upcoming dates to put on your calendar:

*Grandparents Day-Mar 27th

*Spring Break-Mar 13th – 20th

*Egg Hunt Apr 2nd
